RE: Unicity Ingredient Quality Affirmation

Dear Unicity Family and Friends,

Unicity International takes great pride and exerts tremendous effort to ensure that every ingredient in every product we produce is of the highest quality and from the finest sources available. Before being incorporated into a Unicity product, all ingredients are subjected to a rigorous testing protocol to confirm that they are pure and free from contaminants such as pesticides, microbes, and heavy metals. All of our products are produced in facilities that meet and exceed Current Good Manufacturing Practices (cGMP), which were instituted and are enforced by the US Food and Drug Administration (FDA).

Regarding the use of ingredients from Genetically Modified Organisms (GMOs), Unicity International strives to use non-GMO ingredients in our products. In fact, Unicity has been successful in using non-GMO ingredients even in cases where this presents a significant challenge. For example, the soy protein used in our Unicity Complete (Lean Complete or LC) meal replacement shake is from certified non-GMO soybeans. This success in sourcing non-GMO soy for these products is especially significant, because soy is one of the most heavily genetically modified plants in the world today.

In short, every ingredient in each product produced by Unicity International is scientifically verified to guarantee it is of the highest quality and from the best sources in the industry. Many thanks for your support and for your partnership with us on our mission to "Make Life Better"!

With best wishes,

A handwritten signature in black ink that reads "Dr. Dan Gubler".
